

B1  
Cont  
first reproduction control information to reproduce the video information and audio information out of the substantial information for a first reproducing apparatus with video and audio reproduction ability; and

second reproduction control information to reproduce only the audio information out of the substantial information for a second reproducing apparatus with audio only reproduction ability,

C1  
wherein the substantial information and the first reproduction control information are recorded in the video zone, and the second reproduction control information is recorded in the audio zone.

B2  
Cont  
6. (Twice Amended) An information reproducing apparatus for reproducing an information record medium having an audio zone and a video zone comprising: substantial information including video information and audio information which are related to each other; first reproduction control information to reproduce the video information and audio information out of the substantial information for a first reproducing apparatus with video and audio reproduction ability; and second reproduction control information to reproduce only the audio information out of the substantial information for a second reproducing apparatus with audio only reproduction ability, wherein the substantial information and the first reproduction control information are recorded in the video zone, and the second reproduction control information is recorded in the audio zone,

said information reproducing apparatus comprising:

132  
cont  
a reading device for reading the substantial information, the first reproduction control information and the second reproduction control information from said information record medium; and

01  
a reproducing device for reproducing the substantial information in accordance with the first reproduction control information when a reproduction of the video information and the audio information is instructed, and reproducing the substantial information in accordance with the second reproduction control information when a reproduction of only the audio information is instructed.

7. (Twice Amended) An information reproducing apparatus for reproducing an information record medium having an audio zone and a video zone comprising: substantial information including video information and audio information which are related to each other; first reproduction control information to reproduce the video information and audio information out of the substantial information for a first reproducing apparatus with video and audio reproduction ability; and second reproduction control information to reproduce only the audio information out of the substantial information for a second reproducing apparatus with audio only reproduction ability, wherein the substantial information and the first reproduction control information are recorded in the video zone, and the second reproduction control information is recorded in the audio zone,

said information reproducing apparatus comprising:

a reading device for reading the substantial information and the first reproduction control information from said information record medium; and

a reproducing device for reproducing the substantial information in accordance with the first reproduction control information when a reproduction of the video information and the audio information is instructed.

B2  
cont  
C1

8. (Twice Amended) An information reproducing apparatus for reproducing an information record medium having an audio zone and a video zone comprising: substantial information including video information and audio information which are related to each other; first reproduction control information to reproduce the video information and audio information out of the substantial information for a first reproducing apparatus with video and audio reproduction ability; and second reproduction control information to reproduce only the audio information out of the substantial information for a second reproducing apparatus with audio only reproduction ability, wherein the substantial information and the first reproduction control information are recorded in the video zone, and the second reproduction control information is recorded in the audio zone,

said information reproducing apparatus comprising:

a reading device for reading the substantial information and the second reproduction control information from said information record medium; and

a reproducing device for reproducing the substantial information in accordance with second reproduction control information when a reproduction of only the audio information is instructed.

B2  
cont  
C1

9. (Twice Amended) An information reproducing method for reproducing an information record medium having an audio zone and a video zone comprising: substantial information including video information and audio information which are related to each other; first reproduction control information to reproduce the video information and audio information out of the substantial information for a first reproducing apparatus with video and audio reproduction ability; and second reproduction control information to reproduce only the audio information out of the substantial information for a second reproducing apparatus with audio only reproduction ability, wherein the substantial information and the first reproduction control information are recorded in the video zone, and the second reproduction control information is recorded in the audio zone,

said information reproducing method comprising:

a reading process for reading the substantial information, the first reproduction control information and the second reproduction control information from said information record medium; and

a reproducing process for reproducing the substantial information in accordance with the first reproduction control information when a reproduction of the video information and the audio information is instructed, and reproducing the substantial information in accordance with the second reproduction control information when a reproduction of only the audio information is instructed.

10. (Twice Amended) An information reproducing method for reproducing an information record medium having an audio zone and a video zone comprising: substantial

information including video information and audio information which are related to each other; first reproduction control information to reproduce the video information and audio information out of the substantial information for a first reproducing apparatus with video and audio reproduction ability; and second reproduction control information to reproduce only the audio information out of the substantial information for a second reproducing apparatus with audio only reproduction ability, wherein the substantial information and the first reproduction control information are recorded in the video zone, and the second reproduction control information is recorded in the audio zone,

said information reproducing method comprising:

a reading process for reading the substantial information and the first reproduction control information from said information record medium; and

a reproducing process for reproducing the substantial information in accordance with the first reproduction control information when a reproduction of the video information and the audio information is instructed.

11. (Twice Amended) An information reproducing method for reproducing an information record medium having an audio zone and a video zone comprising: substantial information including video information and audio information which are related to each other; first reproduction control information to reproduce the video information and audio information out of the substantial information for a first reproducing apparatus with video and audio reproduction ability; and second reproduction control information to reproduce only the audio information out of the substantial information for a second reproducing apparatus with audio

*Cont*  
only reproduction ability, wherein the substantial information and the first reproduction control information are recorded in the video zone, and the second reproduction control information is recorded in the audio zone,

said information reproducing method comprising:

a reading process for reading the substantial information and the second reproduction control information from said information record medium; and

*C1*  
a reproducing process for reproducing the substantial information in accordance with the second reproduction control information when a reproduction of only the audio information is instructed.

Please add new claims 18-23 as follows:

*B3*  
*Cont*  
18. (New) An information record medium according to claim 1, wherein the first reproducing apparatus is a video player.

19. (New) An information record medium according to claim 1, wherein the second reproducing apparatus is an audio only player.

20. (New) An information reproducing apparatus with video reproduction ability for reproducing an information recording medium having an audio zone and a video zone comprising: substantial information including video information and audio information which are related to each other; first reproduction control information to reproduce the video information and audio information out of substantial information for a first reproducing

apparatus with video and audio reproduction ability; and second reproduction control information to reproduce only the audio information out of the substantial information for a second reproducing apparatus with audio only reproduction ability, wherein the substantial information and the first reproduction control information are recorded in the video zone, and the second reproduction control information is recorded in the audio zone,

the information reproducing apparatus comprising:

a reading device for reading the substantial information and the first reproduction control information; and

a reproduction device for reproducing the substantial information in accordance with the first reproduction control information.

21. (New) An information reproducing apparatus with audio only reproduction ability for reproducing an information recording medium having an audio zone and a video zone comprising: substantial information including video information and audio information which are related to each other; first reproduction control information to reproduce the video information and audio information out of substantial information for a first reproducing apparatus with video and audio reproduction ability; and second reproduction control information to reproduce only the audio information out of the substantial information for a second reproducing apparatus with audio only reproduction ability, wherein the substantial information and the first reproduction control information are recorded in the video zone, and the second reproduction control information is recorded in the audio zone,

the information reproducing apparatus comprising:

a reading device for reading the substantial information and the second reproduction control information; and

a reproduction device for reproducing the substantial information in accordance with the second reproduction control information.

22. (New) An information reproducing method with video reproduction ability for reproducing an information recording medium having an audio zone and a video zone comprising: substantial information including video information and audio information which are related to each other; first reproduction control information to reproduce the video information and audio information out of substantial information for a first reproducing apparatus with video and audio reproduction ability; and second reproduction control information to reproduce only the audio information out of the substantial information for a second reproducing apparatus with audio only reproduction ability, wherein the substantial information and the first reproduction control information are recorded in the video zone, and the second reproduction control information is recorded in the audio zone,

the information reproducing method comprising:

a reading process for reading the substantial information and the first reproduction control information; and

a reproduction process for reproducing the substantial information in accordance with the first reproduction control information.

B3  
C1

23. (New) An information reproducing method with audio only reproduction ability for reproducing an information recording medium having an audio zone and a video zone comprising: substantial information including video information and audio information which are related to each other; first reproduction control information to reproduce the video information and audio information out of substantial information for a first reproducing apparatus with video and audio reproduction ability; and second reproduction control information to reproduce only the audio information out of the substantial information for a second reproducing apparatus with audio only reproduction ability, wherein the substantial information and the first reproduction control information are recorded in the video zone, and the second reproduction control information is recorded in the audio zone,

the information reproducing method comprising:

a reading process for reading the substantial information and the second reproduction control information; and

a reproduction process for reproducing the substantial information in accordance with the second reproduction control information.
